

Instruction on how to use Game Depot app

Log in

User will be guided to create his account with his email, after creating the account the user will be able to interact with the app

CRUD interactions with products

After log in the user will be able to add new products, and sales, the user should search the name of the game in an API. Then chose from the returned options to fill the fields, then the user should add the quantity, platform and the price of the product.

The user can view the information that was added on the view options.

The screenshot shows the 'Add Stock' page of the Game Depot app. The sidebar on the left contains links for Home, Add Stock, Add Sales, View Stock, and View Sales. The main content area has a search bar with 'Sekiro' entered and a 'Search IGDB' button. Below the search bar is a table with the following data:

Product Name	Publisher	Year	Use This
Sekiro: Shadows Die Twice	FromSoftware	2019	<input checked="" type="checkbox"/>
Sekiro: Shadows Die Twice - GOTY Edition	FromSoftware	2020	<input checked="" type="checkbox"/>
Sekiro: Shadows Die Twice - Collector's Edition	Activision	2019	<input checked="" type="checkbox"/>

Below the table is a form to add stock with the following fields:

- Product Name:
- Publisher:
- Platform: ☐ PC ☐ Xbox Series X ☐ Xbox One ☐ PS5 ☐ PS4 ☐ Nintendo Switch
- Quantity:
- Year:
- Price:

The 'Add Stock' button is at the bottom of the form.
